# New Coronavirus Vaccine

## Vaccination Information

Autumn/winter  
vaccination

The additional vaccination of the new coronavirus vaccine is for **everyone from September 20th**

※Children under 6 months old cannot be vaccinated until they are 6 months old.

※If you have not received the 1st vaccination (2 doses for those aged 5 and over, and 3 doses for those aged 6 months to 4 years), you must complete the 1st vaccination first.

Vaccination period	From September 20 <sup>th</sup> , 2023 ※The end date will be announced on the website, etc. in the future.	
Vaccination cost	Free	
Target persons	Those aged 6 months or older who have completed the first vaccination ※If you have not received the first vaccination, please see page 4.	
Number of vaccinations	Once	
Vaccination interval	More than 3 months after the last vaccination	
Vaccine used	Aged 12 and over	Pfizer or Moderna for Omicron strain (XBB) vaccine
	Aged 5~11	Omicron strain (XBB) vaccine for Pfizer for aged 5-11 or Moderna for aged 6-11 ※Moderna Vaccine is used from 6 years old
	Aged 6 months ~4 years	Pfizer Omicron strain (XBB) vaccine for 6 months to 4 years ※Infant vaccines are not manufactured by anyone other than Pfizer

### Important points

- There is no need to separate the influenza vaccine and the coronavirus vaccine (it is possible to get them on the same day). Please note that other vaccinations and the coronavirus vaccine must be separated by two weeks.
- The vaccine will be used either Pfizer vaccine or Moderna vaccine. Both produce effective antibodies, regardless of the type of vaccine previously given.
